Volume 10, Number 1, July 1989

Contents

Editor's Corner: The Legend of the Bad Software Project 1
Robert L. Glass

A Synthetic Approach to the Design of Information-Systems Software 3
Roberto R. Kampfner

A File Management System for a Magnetic Disk Used as a Buffer to Write-Once Optical Storage 15
Daniel A. Cañas and William G. Bulgren

Object-Oriented Graphical Information Systems: Research Plan and Evaluation Metrics 23
Dennis R. Moreau and Wayne D. Dominick

The Interconnectivity Metrics: A New Metric Showing How a Program is Organized 29
Pierre N. Robillard and Germinal Boloix

ENCOMPASS: An Environment for the Incremental Development of Software 41
Robert B. Terwilliger and Roy H. Campbell

A Generalized Optimal Path-Selection Model for Structural Program Testing 55
H. S. Wang, S. R. Hsu, and J. C. Lin

Controversy Corner: The Temporal Relationship Between Theory and Practice 65
Robert L. Glass

Controversy Revisited: Response to: Resolving the Software Science Anomaly 69
Sallie Keller-McNulty and Mark S. McNulty

Further Remarks on Software Science 71
D. N. Card and W. W. Agresti

Biographies 73

Volume 10, Number 2, September 1989

Contents

Editor's Corner: How Can Computer Science Truly Become a Science, and Software Engineering Truly Become Engineering? 75
Robert L. Glass

Architecture of Distributed Data Base Systems 77
Sudha Ram and Clark L. Chastain

PLEASE: Executable Specifications for Incremental Software Development 97
Robert B. Terwilliger and Roy H. Campbell

Design Issues in a Rule-Based System 113
Stephen Fickas

An Overview of Some Software Design Languages 125
Panayotis E. Pintelas and Vasilios Kallistros

Rigorous Definition and Analysis of Program Complexity Measures: An Example Using Nesting 139
James W. Howatt and Albert L. Baker

Controversy Corner: Myths, Unethical Practices, Personnel Requirements: What Do Computer Industry Professionals Really Believe? 151
Hershey H. Friedman and Linda Weiser Friedman

Biographies 155

Volume 10, Number 3, October 1989

Contents

Editor's Corner: Software Metrics: of Lightning Rods and Built-up Tension 157
Robert L. Glass

An Industrial Engineering Approach to Software Development 159
D. N. Card and R. A. Berg

A Validated Performance Model for Distributed File Systems 169
A. Inkeri Verkamo

Considerations for Applying Multiple-Level Protocols to Satellite Communication Networks 201
McCagie B. Rogers

Evaluation of Software Product Quality by Means of Classification Methods 213
Avram Eskenasi

Controversy Corner: Volume, Distance, and Productivity 217
Bruce I. Blum

Biographies 227

Volume 10, Number 4, November 1989

Contents

Editor's Corner: Should a Journal Publish a Virus? 229
Robert L. Glass

Is Software Engineering Graduate-Level Material? 231
James E. Tomayko

Software Engineering Education at Texas Christian University: Adapting a Curriculum to Changing Needs 235
James R. Comer and David J. Rodjak

The Master of Software Engineering (MSE) Program At Seattle University 245
Everald E. Mills

Training Practicing Software Engineers at Texas Instruments 253
Freeman L. Moore and Phillip R. Purvis

Academic/Industrial Collaboration in a Postgraduate MSc Course in Software Engineering 261
David Budgen, Peter Henderson, and Chic Rattray

The Boston University Software Engineering Graduate Program: Continuing Education Through Interactive Television 267
John W. Brackett

An Empirical Study of COBOL Programs Via a Style Analyzer: The Benefits of Good Programming Style 271
Alan C. Benander and Barbara A. Benander

Lessons Learned Teaching Ada in the Context of Software Engineering 281
James E. Tomayko

Biographies 285
